

REV-1 KOOL M1

REV-1 Kool M1 is a soluble oil formulated as a general purpose multi-metal coolant for general machining of ferrous and non-ferrous materials except magnesium.

It provides excellent protection against rust and has good anti-foaming capability. Kool M1 is fortified with biocides to prevent rancidity; minimizing unpleasant odors, split emulsion and reduced product performance.

Blended with high mineral oil content, it possesses good lubricity as well as wetting and cooling results.

APPLICATIONS/ BENEFITS

- Protects against rust/corrosion
- Non foaming
- Excellent wetting and cooling capability
- Resists bacterial attack

TYPICAL CHARACTERISTICS

TEST DESCRIPTION	TYPICAL RESULTS
Appearance	Amber
Specific Gravity	0.89
Emulsion	Milky
pH at 3%	9.2
IP 287 Corrosion Test%	4
Defoam ml (5% in 50ppm water)	Nil
Refractomer Factor	1.0
